BRICKS

Limena, close to Venice, in the North Eastern part of Italy hosts the Company headquarters and the biggest manufacturing facility (the other being in Bergamo). Main mechanical components are manufactured in the state of the art automated Company workshops in order to keep always the highest quality and consistency in our deliveries. While the main functions are coordinated from the headquarters, the other branches (Bergamo, Genova, Miami, Kansas City, Dubai, Moscow...) assure prompt and effective service.

We assist you from the very beginning for the entire life of the project and over!

We cover each step of the project execution from the feasibility study and basic design to the assembly, installation, start up and for any need after commissioning, while the plant is in operation. We still proudly offer a TAILOR MADE solution for our Customers. Optimizing investment returns means well-designed installation and innovative mechanical solutions. Our products rate best in the market in terms of energy consumption operational costs and pollution control, as a result of our commitment to environment protection.

Services

Our goal is to add value to your Bedeschi Experience, Customers' satisfaction is our priority.

We are providing solutions since 1908 with a worldwide network to support all your needs, from maintenance to readily available spare parts.

Our team of engineers and technicians can provide a tailor-made service portfolio for plant operation and maintenance, spare parts, revamping, and enhancement on any type of machine.

After sales

One of the main quality of Bedeschi is the highest degree of specialization and our field engineers are no exception. We are present in most of the regions in the world on 24/7 basis for bulk material handling, cranes and bricks installation.

With our trouble-free maintenance programs, our technical staff will completely take care of your maintenance needs. Our yearly service agreement could include:

- Prompt field assistance;
- Coaching for the plant's personnel;
- Equipment survey (mechanical, electrical and structural analysis);
- Obsolescence management;
- Minimize environmental impact;
- Effective operational cost management;
- Efficiency and productivity enhancement;
- Remote monitoring of equipment status with latest technology.

Spare parts

In most cases we have emergency spare parts available within few ours from customer site.

For normal wear and tear components we can assist in providing original high-standard Bedeschi component or other items, we can plan together the future needs based on actual usage and future improvement in order to have a smooth and effective maintenance on the installation without any interruption of the production cycle.

Bedeschi stock offers a wide range of components readily available for just-in-time delivery.

Revamping and enhancements

We enhance cranes and handling equipment, we can provide height and outreach increases, span change, replacement of old trolleys, renewal of electrical equipment, motors replacement, increasing cranes performances by rebirthing the cranes for upgrading its residual life and increasing cost savings; your cranes or any kind of travelling cranes can be refurbished with upgraded capacity, better service, speeds, geometrical update, duty classification and durability, saving on operation costs and maintenance of the apparatus, whilst improving productivity, safety and reliability. Renewal of the entire electrical equipment, including cabling, is provided by mechanical and electrical engineering team.

With the purpose to give full attention to the needs of the Customer, revamping service guarantees assistance, greatest effectiveness to maintenance service. We can inspect any type of equipment (also by others) to assess the most cost-effective revamping option and offer:

- Repairs and improvement of equipment performance;
- Necessary Spare parts;
- Upgrade/modernization of existing parts;
- Performances tracking;
- Diagnostic systems;
- Mechanical and electrical survey of the equipment;
- Warehouse management;
- Technical advisory for installation;
- Consultancy.
